PROJECTS

Worked on a project name **"Portfolio"**.

Description – This is a personal portfolio site using HTML, CSS, JAVA Script, NodeJs, MongoDB and there are five sections on one page-Home, About, Services, Skills and contact, and each section is attractive and eye catching. On the home page of this site, on the top, there is a sticky navigation bar with a logo on the left side and some navigation links are on the right side. on the left side of the home page, there are texts which are about the name, profession, and a button labelled " Hire me" button.

Worked on a project named **"Blog Website"**.

Description – Implemented this blog website using HTML, CSS, NODEJS, MongoDB & where it is used for writing something and post here. It is a user-friendly website where you can reply others comment and share somethings. Blog Website have big database where all data stored and safe.

Worked on a project named **"Myntra Clone"**.

Description – This is a simple yet impressive Amazon clone using only HTML and CSS. By recreating the main elements of the Amazon homepage, such as the navigation bar, search bar, hero section, cards, and footer.

Worked on a project named **"School Management system"**.

Description – A school management system is a software application that is design to streamline various administrative tasks within a school. A well-designed SMS page can increase or boost website in internet. In this guide, we'll show you how to design a beautiful and functional School Management System using HTML and CSS, the basic building blocks of web design. By the end of this article, you'll have the knowledge and tools you need to create a stunning School Management System page that will attract by parents and students.

Worked on a project named **"Student Management System"**.

Description – Developed a comprehensive student management system in java, demonstrating proficiency in object-oriented programming. Implemented features such as student registration, grade tracking, and attendance management. Utilized java swing for the graphical user interface, ensuring a user-friendly experience. Employed data structures for efficient data organization and storage.
